The Richmond Recreation Committee is submitting a new committee structure for review by the Selectboard. We are suggesting these changes based on our group experiences of the last year.

We are recommending the removal of alternate positions as they have been less attractive to applicants for their requirement of committee duties without any voting power. There have also been some difficulties in attracting enough members to fill open seats, so we are suggesting reducing the committee size to 6 Richmond Residents, 1 Bolton Resident, and 1 Huntington Resident. Should an additional seat open in the future in the event someone steps down or their term expires without reapplying we would suggest reviewing removal of that seat as well. This is under the assumption that there may not be additional applicants interested in filling that spot and should be revisited at the time of an opening. Ultimately we are seeking a more efficient committee size to accomplish our goals without struggling to meet quorum.

Thank you for your consideration of our proposal,

Richmond Recreation Committee
