

Collaborate with the Trails Committee to:

1. Ask RTC to identify Trailforks at their webpage

<https://www.richmondvt.gov/boards-meetings/trails-committee> as the 'go-to' site for trails systems information, if that is the case.

Question: Does RTC need to create a paid account with Trailforks?

(The links to www.Trailfinder.info should be retained, and possibly updated).

2. Identify a person responsible for updates of the ACF trails at Trailforks (Jim Cochran?)

Remove permission of others who have entered/updated information on ACF trails, identify our responsible person as the contact person for updates, trail reports, trail photos etc.

3. Create a Trailforks trail system called Andrew Community Forest and include the following (renamed) trails (tracks look OK). Consider adding ACF to Trailfinder.info

4. Rename Trail names at Trailforks

Parking to Power -> Access Road

Mountain View (stet)

Urbanik Way (stet)

Fields Road to VYCC -> Former VAST Trail

-> Specify permitted uses of each trail i.e. Bike, Hike, Ski, Snowshoe.

-> Ensure consistency with the trails map at the kiosk (and that map to be posted elsewhere).

-> Address shared responsibility of VAST trail with Maple Wind?

5. Ask RTC to add ACF Trails to the RTC webpage at

<https://www.richmondvt.gov/boards-meetings/trails-committee>

Incidentally – ask RTC to update their Trailforks entries at

<https://www.trailforks.com/region/richmond-1454560310/ridingareas/>

to correct the name “Richmond River Trail” to “Warren and Ruth Beeken Rivershore trail”.
