

Welcome!

Please sign in and also list any animals seen!

This helps us manage wildlife impacts and understand how our presence is affecting the forest. We ask that folks stay off this trail from Nov 1st to May 1st AND that traffic is limited to **10 users per day**. If you see more than this has already signed in, we kindly ask that you turn around and find another space to recreate. This gives the forest rest and leaves the animals space to maintain their natural biorhythms.

Thanks for helping to steward this wonderful space!
