Introduction to Vermont's Capital Plan & Budget

The Vermont Planning and Development Act (4 V.S.A., Chapter 117) specifically authorizes municipalities with duly adopted municipal plans to adopt a Capital Budget and Plan (§§ 4403, 4443) which allows municipalities to prioritize capital expenditures over a specific period of time. The Capital Budget and Plan should match capital projects and equipment purchases that are included in the annual budget which is approved by the Selectboard and presented for approval by Town of Richmond voters. The Capital Budget and Plan contains projects and equipment costs, and methods of financing, and prioritizes them for each of the next five years.

Overview of Richmond's Capital Plan and Budget

The Richmond Budget and Capital Plan represents a plan of action for the Town that furthers the goals of the Richmond Town Plan. This plan shows how we can renew and modernize our current stock of public facilities and equipment, which in turn enhances public service delivery when needed.

One objective of this Capital Plan is to reduce the need for short- and long-term loans which cost the Town hundreds of thousands of dollars. This plan will allow us to replace equipment on a more realistic schedule which may reduce spending money on costly repairs. In addition, we may recognize gains when a vendor offers us money for trading in existing equipment when we are purchasing new equipment.

Looking at our future needs and raising taxes to build up specific reserves in advance of capital expenditures should assist us in reducing some of the highs and lows of capital expenditures that occur in annual budgets. This Capital Plan shows how we can then utilize the Reserves, along with Restricted and Unsinged Funds, to purchase and maintain public facilities and equipment in the future.

Richmond's Growth and the Town Plan

One of the most important purposes of this Capital Plan is to anticipate the needs of Richmond's residents for public improvements and to provide a sensible plan for meeting those needs. In general, long-term needs are determined by the Richmond Town Plan and the work of the Planning Commission in analyzing land-use and population trends with respect to the financial capacity of Richmond to provide services.

The current 2018 Richmond Town Plan identifies demographic and economic trends, and establishes goals to balance the sustainability of the town with respect to its expected growth over time. County-wide, there is the need for housing units in general and housing units of different types. According to the US Census Bureau, in 2019, the rental housing vacancy rate statewide was 3.4 percent, and the rental housing vacancy rate in Chittenden County was 2 percent.

The Town Plan anticipates Richmond's population will continue to increase at the rate of about 2-3% for the next 10 years. Richmond must anticipate this potential growth and its effect on municipal facilities and services, and on Richmond's budget. The Town Plan includes the Utilities

and Facilities Plan, pursuant to 24 V.S.A. §4382. This plan is a review of the inventory of the town's land, buildings, and equipment and puts forth a set of goals and actions to ensure the sustainability and longevity of the town's assets and infrastructure with respect to the anticipated growth and the need for modernization over time.

This Capital Plan and Budget projects the cost to provide and maintain the facilities and services for that anticipated growth. The Capital Plan and Budget "levels out" the peaks and valleys of capital costs that might otherwise occur. Property tax payers expect and deserve to receive a high level of service for their tax dollar, without experiencing significant fluctuations in their annual tax amount.

However, a number of factors could play a role in the implementation of the Capital Plan and Budget. The anticipated growth of the Town would be highly dependent on planning and zoning policies to accommodate future residential development. An increase in the number of buildings, both commercial and residential, will add value to the grand list and thus distribute the tax burden. Similarly, an increase in the number of water and wastewater system accounts helps to distribute their cost burden as well.

Background for Richmond's Capital Plan & Budget

In 2021 an inventory was taken of Richmond's existing capital resources with a value of \$5,000 or more. Databases for highways and town equipment were utilized to inventory acquisitions and the outside auditors track fixed assets as part of the annual town audit.

II. DEFINITIONS

- The following definitions are based on the Vermont Planning and Development Act (24 V.S.A., Chapter 117), § 4430.
- <u>Capital Budget</u> Lists and describes the capital projects to be undertaken during the coming fiscal year, the estimated costs of those projects, and the proposed method of financing.
- <u>Capital Plan</u> A plan of capital projects proposed to be undertaken during each year through year five of the Capital Plan, including the cost for those projects and the method of financing.
- <u>Capital Project</u> A capital project is any one or more of the following:
 - Any physical betterment or improvement including furnishings, machinery, apparatus
 or equipment for that physical betterment or improvement when first constructed or
 acquired;
 - (2) Any preliminary studies and surveys relating to any physical betterment, or improvement;
 - (3) Lands or rights in land;
 - (4) Any combination of (1), (2), and (3).
- <u>Impact Fee</u> A fee levied as a condition of a zoning or subdivision permit which is used to cover any portion of the costs of an existing or planned capital project that will benefit or is attributable to the users of a new development or to compensate the municipality for any

expenses it incurs as a result of construction. The fee may be levied for recoupment of costs for previously extended capital outlay for a capital project that will benefit the users of the development.

III. FUNDING SOURCES FOR THE CAPITAL PLAN AND BUDGET

- A. Reserves A reserve fund is a sum of money raised from the General Fund, via taxes, and/or from impact fees that is deposited in an interest earning account prior to the purchase of a capital project. The purpose of the reserve fund is to spread over a number of years the total amount of money that otherwise would be raised in one year for a capital project. This effectively reduces the sharp increases the tax rate can experience when the money for a large cost capital project is raised in one year. The reserve fund can be planned such that the total sum collected will account for the entire amount of the planned capital project. Or, a reserve fund can be used to partially pay for a bonded capital project, therefore reducing the total amount of interest to be paid by the town.
- B. <u>Impact Fees</u> Impact fees are fees charged at the issuance of a zoning or subdivision permit which will be used to offset costs of an existing or planned capital project that will benefit or is attributable to the users of the development or to compensate Richmond for any expenses it incurs as a result of construction. Impact fees are deposited in a restricted reserve fund for a planned capital project. Impact fees are driven by the Capital Plan and should adjust annually as such.
- C. <u>General Obligation Bonds</u> These loans are written promises by Richmond to pay a specified sum of money (i.e., the principal amount) at a specified date(s) in the future (i.e., the maturity dates) together with periodic interest at a specified rate. A bond typically runs for a longer term and is a more formal instrument than a note or most lease-purchase agreements.
- D. Bank Notes Short-term, one-to-five-year term generally.
- E. <u>State Aid and Grants</u> State aid in the form of grants or matching funds are utilized in transportation projects.
- F. <u>User Fees</u> A user fee is a fee imposed upon only the users of a particular public facility or utility. For example, only those residents hooked onto the municipal water and sewer systems will be charged fees for paying for upgrades to the systems.
- G. <u>Fund-raiser</u> Capital projects financed by fund-raisers are obtained through voluntary contributions and donations.
- H. <u>General Fund</u> Any capital projects not funded in part or in whole from the aforementioned revenue sources will be financed through the General Fund, i.e., taxes.
- I. <u>Unassigned and Restricted Unassigned funds</u> May be utilized as a down deposit or purchase of capital equipment or a capital project. These funds are a result of excess revenue or unspent budget lines from year to year.

III. RICHMOND CAPITAL EQUIPMENT DESCRIPTIONS AND JUSTIFICATIONS

Each capital project or equipment is identified by department, item name, and year acquired. An estimated purchase or replacement amount is listed with the year for such activity. A brief description and justification for each capital project is included with the total cost over the Plan and the year in which each project is Planned for "purchase".

TOWN ADMINISTRATION

Administrative Equipment	Past Capital Plan Cost	Past Life Cycle	Future Capital Plan Cost	Future Life Cycle
Server	7,500	FY 16	10,000	FY 23
Copier #1	3,744	FY 21	4 500	EV 24
Copier #2	3,449	FY 13	4,500	FY 24
Copier #3	4,302		4,500	FY2 6

The copiers and server are utilized by Administrative Staff in the Town Offices. Starting in Fiscal Year 2023 a six-year life cycle will be implemented on all the listed pieces of equipment in order to keep up with technology changes and to avoid the cost of repairs and costly leases. The Capital Plan covers items over 5,000 so for purposes of this plan we will not include desktop and laptop computers that are utilized however they are on a schedule as well.

Finding Source: The server, copiers, and computers are all funded by raising taxes or utilizing unassigned funds as voted on in the annual budget through the Technology line.

POLICE

Cruiser and emergency equipment replacement cycle (6)	Past Capital Plan Cost	Past Life Cycle 4	Future Capital Plan Cost	Future Life Cycle 4
Ford Interceptor #1 2018	38,674	FY 18	46,250	FY 23
Ford Interceptor #3 2017	35,258	FY 17	46,250	FY 23
Ford Interceptor #5 2019	41,148	FY 19	48,250	FY 24
Tesla #2 2021	31,460	FY 22	50,250	FY 25
Dodge Durango #6 2020	40,213	FY 20	50,250	FY 25
Ford Interceptor #4 2016	34,460	FY 16	52,250	FY 26
Ford Interceptor #1 2022	46,250	FY 23	54,250	FY 27
Ford Interceptor #3 2022	46,250	FY 23	54,250	FY27

In FY20 we moved to a six-vehicle fleet, on a four-year replacement schedule. One vehicle will be unmarked and used by the Chief of Police, four vehicles will be utilized by full time officers, and one vehicle will be shared by three periderm officers. Each year the replacement schedule will be reevaluated and subject to change based on staffing, mileage, and the age of the vehicle(s) that are scheduled to be replaced.

The purchase in FY23 for two cruisers will be paid for with a combination of taxes raised for direct payment, Capital Reserve funds, and Unassigned funds. Starting with FY23 through will purchase vehicles on a one to two cruiser purchase on alternating years.

Funding Source: Starting with FY24 all cruisers will be purchased utilizing the Police Capital Reserve. The reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Police Video Dashcams (6)	Past Capital Plan Cost	Past Cycle 4	Future Capital Plan Cost	Future Cycle 4
For Cruiser #1 & #3		·	0	FY 23
For Cruiser #5			5,000	FY 24
For Cruiser #2 & #6			10,000	FY 25
For Cruiser #4			5,000	FY 26
For Cruiser #1 & #3			10,000	FY 27

Each system is \$5,000 and there will be one replaced with each new vehicle purchased beginning in FY 23. We are establishing a four-year life cycle due to continuous technology changes.

Funding Source: The cost of the Dashcams will be paid for through the Police cruiser equipment annual budget line.

	Past Capital		Future Capital	
Police Video Body Camaras	Plan Cost	Past Cycle	Plan Cost	Future Cycle 4
Purchasing (6)			10,000	FY 23

The department currently owns five body camaras and is increasing to six. The goal is to have one body camara for the Police Chief, four for full time officers, and one to be shared by the three peridium officers and serve as a backup if one body camara is out of service. We are purchasing six in FY22 and they should not need to be replaced for another four years.

Funding Source: Although the total cost is \$10,000 the cost will be spread over a period of four years and through the Body Camara annual budget line.

Mobile Data Computers (6)	Past Capital Plan Cost	Past Cycle	Future Capital Plan Cost	Future Cycle 4
For Cruiser #1 & #3			6,500	FY 23
For Cruiser #5	·		6,500	FY 24
For Cruiser #2 & #6			13,000	FY 25
For Cruiser #4			6,500	FY 26
For Cruiser #1 & #3			13,000	FY 27

There are six mobile data computers, one for each cruiser, and they are priced at \$6,500 each. They are to be replaced on the same schedule as police cruisers with a four-year estimated life cycle. The alternating schedule will begin in FY24 with the purchase of one to be followed by two in FY25.

Funding Source: These computers are being paid for through the Police Cruiser equipment budget line.

Fire Trucks (3)	Past Capital Plan Cost	Past Life Cycle 20	Future Capital Plan Cost	Future Life Cycle 15
Fire Engine # 1 2011	363,883	FY 11	500000	FY 28 & FY 29
Fire Engine # 2 2015	386,164	FY 16	500000	FY 30 & FY 31
Fire Engine # 3 2018	384,542	FY 19	500,000	FY 33 & FY 34

Based on the current conditions of our Fire Engines, the cost of repairs, and trade in values, we are changing the life expectancy from 20 years to 15. The next Fire Engine to be replaced is Fire Engine #1 in FY 29 with a deposit of \$100,000 in FY 28 and final payment of \$400,000 in FY 29 for a total approximate cost of \$500,000 and an undetermined trade in or salvage value at this time.

Funding Source: The funds used to pay for Fire Engine #1 will come from the Fire Department Capital Reserve fund. The reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Rescue Truck	Past Capital Plan Cost	Past Life Cycle 20	Future Capital Plan Cost	Future Life Cycle 15
Rescue Truck	199,534	FY 06	500,000	FY 27

Based on the current condition of the Rescue Truck, the cost of repairs, and trade in values, we are changing the life expectancy from 20 to 15 years. Utility trucks carry all rescue equipment for car accidents, structure fires, rescue situations, and interstate accidents which are on the rise. The current Utility Truck was purchased in 2005 and should be replaced now, however, the current loan on this Rescue Truck will not be paid off until FY 26. Therefore, the new Rescue Truck will not be purchased until FY 2027, and maintenance and repairs will be made as needed to keep it in safe working condition.

Funding Source: The funds used to pay for the Rescue Truck will come from the Fire Department Capital Reserve fund and unassigned funds. The reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Brush Truck	Past Capital Plan Cost	Past Life Cycle 20	Future Capital Plan Cost	Future Life Cycle 10
Brush Truck	52,236	FY 09	200,000	FY 23

Based on the current condition of the Brush Truck, the cost of repairs, and trade in values, we are changing the life expectancy from 20 to 10 years. Due to the Brush truck being utilized for brush fires, forest fires, traffic control on the interstate, backroads, and fields, we believe this should be moved from a 20 to a 10-year life cycle. The current Brush Truck was purchased in FY09 and is scheduled to be replaced in FY23.

Funding Source: The Brush Truck will be paid for by utilizing Fire Department Capital Reserve funds in FY23. Going forward, the reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Jaws of Life (2)	Past Capital Plan Cost	Past Life Cycle 15	Future Capital Plan Cost	Future Life Cycle 15
Jaws of Life #1 portable		FY 05	13,000	FY 24
Jaws of Life #2 Stationary		FY 06	13,000	FY 27
Jaws of Life #3 portable		FY 21	13,000	FY 36

The life cycle for each jaws of life varies due to usage and the life cycle stated here is subject to change depending on the condition of the equipment and the attachments that go with them. The portable units should be replaced at the end of a 15-year life cycle or sooner if needed. The stationary unit is stored on the Rescue Truck and should be replaced when the Rescue Truck is replaced in FY27. These are critical pieces of equipment for vehicle accidents on and off roads. With the increased number of accidents, we are attending on the interstate and secondary roads these are being used more frequently.

Funding Source: This equipment is funded with the Capital Reserve. The Capital Reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Air Compressor	Past Capital Plan Cost	Past Life Cycle 15	Future Capital Plan Cost	Future Life Cycle 15
Air Compressor		FY05	35,000	FY25

Richmond Capital Plan and Budget FY2023-FY2027

Public Hearing: TBD

The Air Compressor is used to fill the air tanks and should be replaced on a 15-year cycle.

Funding Source: This equipment is funded with the Capital Reserve. The Capital Reserve will be maintained and funded through the Capital Reserve line in the annual budget.

Air Packs (17)	Past Capital Plan Cost	Past Life Cycle 15	Future Capital Plan Cost	Future Life Cycle 15
Airpack(s) quantity (2))			18,000	FY 23
Airpack(s) quantity (1)			10,000	FY 24
Airpack(s) quantity (1)			10,000	FY 25
Airpack(s) quantity (1)			10,000	FY 26
Airpack(s) quantity (1)			10,000	FY 27

Each fire fighter that enters a building, or is entering a hazardous area, must have a breathing apparatus that is properly functioning and current with firefighting equipment standards.

We continue to replace Scott Airpacks with MSA Air Packs, which eliminates the need to ship packs away for repair and endure shipping cost. The Department needs a specified number of Airpacks per vehicle; The Rescue vehicle requires 5, Truck #1 requires 5, Truck #2 requires 5, and Truck #3 requires 2, for a total of 17.

Funding Source: This equipment is funded with the Safety Equipment Reserve. The Safety Equipment Reserve will be maintained and funded through the Safety Equipment Reserve line in the annual budget.

Air Tanks (51)	Past Capital Plan Cost	Past Life Cycle 15	Future Capital Plan Cost	Future Life Cycle 15
Air Tanks quantity (6)			9,000	FY 23
Air Tanks quantity (3)			4,500	FY 24
Air Tanks quantity (3)			4,500	FY 25
Air Tanks quantity (3)			4,500	FY 26

We need three air tanks for each of the 17 air packs.

Funding Source: This equipment is funded with the Safety Equipment Reserve. The Safety Equipment Reserve will be maintained and funded through the Safety Equipment Reserve line in the annual budget.

Turn Out Gear (25)	Past Capital Plan Cost	Past Life Cycle 10	Future Capital Plan Cost	Future Life Cycle 10
Turn Out Gear (3)			10,500	FY 23
Turn Out Gear (2)			8,000	FY 24
Turn Out Gear (2)			8,000	FY 25
Turn Out Gear (2)			8,000	FY 26
Turn Out Gear (2)			8,000	FY 27

Turnout Gear is the heavy coats, hats, boots, etc. worn by firefighters and have a cost of \$3,500 for each set. We currently have 18 total sets of Turnout gear that are on a 10-year cycle. However, if a set is damaged in a fire the life cycle is subject to change. In addition, if we have new firefighters, and we have do not have any spare sets that will fit them properly, we will need to purchase sets as needed.

Funding Source: This equipment is funded with the Safety Equipment Reserve. The Safety Equipment Reserve will be maintained and funded through the Safety Equipment Reserve line in the annual budget.

HIGHWAY

Dump truck fleet (4)	Past Capital Plan Cost	Past Life Cycle 8	Future Capital Plan Cost	Future Life Cycle 7
International HV507 single #3 2015	132,612	FY 16	206,884	FY 23
International HV tandem #4 2019	133,045	FY 19	210,000	FY 26
International 7600 tandem #2 2020	172,530	FY 20	210000	FY 27
International 7600 tandem #1 2022	124,222	FY 22	210,000	FY 29

The Replacement cycle for Dump Trucks has been changed from eight to seven years due to the complexity of the new diesel trucks and the coverage of warranties. The best warranty we can purchase is 84 months, or seven years, and that will cover these trucks bumper to bumper. This also keeps our trade-in value at approximately 25%.

Funding Source:

Dump Truck #3 will be funded utilizing a combination of a deposit raised with taxes and unassigned funds. Future trucks will be paid for by utilizing the Highway Capital Reserve funds. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

Pickup fleet (3)	Past Capital Plan Cost	Past Life Cycle	Future Capital Plan Cost	Future Life Cycle 7
Chevrolet 2500 #7 2017	56,280	FY 17	78,000	FY 24
Ford F550 2019 #5	68,696	FY 19	78,000	FY 26
Chevrolet 3500 #6 2021	46,280	FY 21	78,000	FY 29

The pickup fleet consists of three vehicles that carry a V box sander for salt and sand application in the winter months. One truck is for the Foreman, the second and third truck are used for road checks as well as all construction projects. By changing the cycle from four years to three years our fleet does not exceed nine years in age and we can get a decent return on the trade and save us from having to do costly repairs.

Funding Source: Future trucks will be paid for by utilizing the Highway Capital Reserve funds. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

	Past		Future	
	Capital		Capital	
	Plan	Past Life	Plan	Future Life
Grader	Cost	Cycle	Cost	Cycle
		12		12
John Deere 772gp	308,344	2017	500,000	FY 29

The Grader is an essential machine for all gravel road maintenance as well as the implementation of the gravel road plan. The road grader was purchased in FY 19, however, it was a 2017 demo model at that time. We currently average 300 hours yearly and the ideal replacement schedule for the road grader is between 3,500 and 5,000 hours.

Funding Source: The grader currently has a loan and is paid for through the budget. The last payment on the loan will be made in FY 27 and will paid for with taxes as part of the budget each year.

Going forward, the Grader will be paid for utilizing the Highway Capital Reserve fund. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

Front End Bucket Loader	Past Capital Plan Cost	Past Cycle	Future Capital Plan Cost	Future Life Cycle
		10		10
John Deere 524K 2012	112,821	FY 14	175,000	FY 23

The Town owns one front-end bucket loader utilized in a variety of summer and winter loading tasks. The current loader was purchased in FY 14 but was a 2012 demo model. The loader averages 350 to 400 hours annually. The ideal replacement schedule for this machine would be not more than 4,000 hours as it is a critical machine for road maintenance in the winter months.

Funding Source: In FY 23 the front-end Loader will be funded using a combination of a deposit raised from taxes and unassigned funds. Going forward, the Bucket Loader will be

paid for utilizing the Highway Capital Reserve fund. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

Excavator	Past Capital Plan Cost	Past Life Cycle 12	Future Capital Plan Cost	Future Life Cycle 12
Catapillar M316C 2005	61,644	FY 12	275,000	FY 23

The Town owns one rubber tire excavator that is very cost effective for maintaining the Town's drainage systems. For the past 10 years the excavator has played a major role in road repairs due to FEMA events as well as implementing grant funded projects. The 2005 M316 machine was purchased used in 2012 for \$100,000 and has more than paid for itself in FEMA reimbursements and grant projects. The average annual use of the excavator is between 375 and 425 hours. Ideal replacement schedule for this machine would be not more than 5000 hours.

Funding Source: The Excavator will be paid for with a combination of a deposit raised from taxes and unassigned funds. Going forward, the Excavator will be paid for utilizing the Highway Capital Reserve fund. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

Mowers/ Snowblower	Last Capital Plan Cost	Last Cycle 8	Future Capital Plan Cost	Future Life Cycle 8
Ventrac 2016	45,667	FY 17	52,000	FY 25

The Ventrac machine was purchase to maintain the Volunteers Green, Round Church, Brown's Court ballfield, property on Cochran Road as well as the Riverview cemetery. This machine runs year-round and in the winter months is our sidewalk plow / snowblower and averages 360 hours annually. Ideal replacement should be around 3,000 hrs.

Funding Source: The Ventrac will be paid for utilizing the Highway Capital Reserve fund. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

Tractor/Mower	Last Capital Plan Cost	Last Cycle 10	Future Capital Plan Cost	Future Life Cycle 11
Challenger 445b w side arm 2011	66,500	FY 11	110,000	FY 24

The roadside mower was purchased in FY 2011 as a used machine. The model year for this mower / tractor is 2008. The roadside mower is only used for the mowing of roadsides. We average 400 hours of mowing annually. Ideally, we should replace this piece of equipment after 5,000 hours of use.

Funding Source: The Challenger will be paid for utilizing the Highway Capital Reserve fund. The Highway Capital Reserve will be maintained and funded through the Highway Capital Reserve line in the annual budget.

IV. RICHMOND CAPITAL BUILDING AND INFRASTRUCTURE DESCRIPTIONS AND JUSTIFICATIONS

Each capital project is identified by department and project name, and cost, and funding source. New projects have an estimated begin date which is subject to change depending on the voter's approval the project.

Funding Source : Loan

The Town of Richmond has prepared a 15-year capital needs projection primarily based on the replacement cycle for preliminary long-range capital infrastructure expansions, acquisitions and renovations. Prioritization and financing have not yet been determined, and no project has a significant impact on the adopted Capital Plan and Budget. The information does however provide a reasonable projection, based on current information, of the potential needs for the foreseeable future. For this document the spreadsheets have been abridged to only show the FY2023-FY2027 expenditures. A copy of the full 15-year spread sheets is available from the Town Manager.

APPENDIX ONE - VERMONT STATUTES ANNOTATED PERTAINING TO THE CAPITAL PLAN AND BUDGET

Under the Vermont Planning and Development Act (24 V.S.A. Chapter 117), municipalities that have an adopted municipal plan are authorized to put together a Capital Plan and Budget. Specific references to the Capital Plan and Budget in the Vermont Planning and Development Act are listed below. This is only a summary; full text must be obtained from the statute.

24 VSA §4430. Capital Plan and Budget.

- (a) A capital budget shall list and describe the capital projects to be undertaken during the coming fiscal year, the estimated cost thereof, and the proposed method of financing. A Capital Plan is a plan of capital projects proposed to be undertaken during each of the following five years, the estimated cost thereof and the proposed method of financing. A capital project is:
 - (1) any physical betterment or improvement including furnishings, machinery, apparatus or equipment for such physical betterment or improvement when first constructed or acquired;
 - (2) any preliminary studies and surveys relating to any physical betterment, or improvement;
 - (3) land or rights in land; or
 - (4) any combination of paragraphs (1), (2), and (3) of this subsection.
- (b) The Capital Plan and Budget shall be arranged in such manner as to indicate the order of priority of each capital project, and to state for each project:
 - (1) a description of the proposed project and the estimated total cost thereof;
 - (2) the proposed method of financing, indicating the amount proposed to be financed by direct budgetary appropriation or duly established reserve funds; the amount, if any, estimated to be received from the federal or state governments; and the amount to be financed by the issuance of obligations, showing the proposed type or types of obligations, together with the period of probable usefulness for which they are proposed to be issued; and
 - (3) an estimate of the effect, if any, upon operating costs of the municipality.
- c) The planning commission may submit recommendations annually to the legislative body for the Capital Plan and Budget, which shall be in conformance with the municipal development plan.

24 VSA §4443. Adoption, amendment, or repeal of Capital Plan and Budget.

(a) . . . a Capital Plan and Budget may be adopted . . . by the legislative body . . . following one or more public hearings, upon public notice, if a facilities and services plan as described in Section 4382(a)(4) has been adopted by the legislative body in accordance with sections 4384 and 4385 of this title. A copy of

the proposed Capital Plan and Budget shall be filed at least 15 days prior to the final public hearing with the clerk of the municipality and the secretary of the planning commission. The planning commission may submit a report on the proposal to the legislative body prior to the public hearing.

(b) The Capital Plan and Budget . . . shall be adopted . . . by an act of the legislative body of a municipality promptly after the final public hearing held under subsection (a) of this section.

Capital Plan Suggestions

Infrastructure Improvements

Bridge Street Redesign	\$300,000.00	FY2026

This project would be the implementation of the Bridge Street Complete Streets Corridor Study undertaken in FY2021 with the support of the CCRPC Unified Planning Work Program (UPWP). This project includes: the restriping of Bridge Street to improve vehicle and bicycle safety; the installation of sidewalks and a bump-out; the addition of traffic control measures along Bridge Street and at the intersection of Bridge Street and Huntington Road; and the installation of streetscape improvements including but not limited to street lighting, furniture, and other furnishings. Project estimate is based on estimates calculated in the study and intangibles. Additional elements may be added to this project subject to streetscape design and recommended improvements.

For the purposes of the spreadsheet, the total cost of improvements of \$300,000 is listed. This project is eligible for funding from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant, and the Bicycle and Pedestrian Program Small-Scale Grant; and the Town will pursue funding for this project.

If the Town is awarded a grant from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant, the required match would be \$60,000 (20 percent of project costs). If the Town is awarded a grant from the Vermont Agency of Transportation Bicycle and Pedestrian Program Small-Scale Grant, the required match would be \$150,000 (50 percent of project costs).

Huntington Road Sidewalk Facility	\$1,000,000.00		FY2027
--	----------------	--	--------

This project would run parallel with Huntington Road, connecting the end of the sidewalk along Huntington Road to the Johnnie Brook trailhead. Further study of the viability of the sidewalk will be undertaken in FY2022 with the assistance from the FY2022 CCRPC Unified Planning Work Program (UPWP).

Project costs are based on the Vermont Agency of Transportation Report on Shared-Use Path and Sidewalk Construction from January 2020. Total cost may vary after further study in FY2022. For the purposes of this spreadsheet, the total cost of improvements is listed. This project is eligible for funding from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant and the town will pursue outside funding for this project.

If the Town is awarded a grant from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant, the required match would be \$200,000 (20 percent of project costs). This project also may be eligible for the Vermont Agency of Transportation's Transportation Alternatives Program Grant. If the Town is awarded a grant from the Vermont Agency of Transportation's Transportation Alternative Program Grant, the required match would be \$200,000 (20 percent of project costs).

Jericho Road Sidewalk Facility	\$1,000,000.00	FY2027
Solitono Roda Oldewank I defilty	Ψ1,000,000.00	1 1 2027

This project would run parallel with Jericho Road, connecting the end of the sidewalk at the School Street/Jericho Road intersection to the Jericho Road/Valley View Road intersection. Further study of the viability of the sidewalk will be undertaken in FY2022 with the assistance from the FY2022

CCRPC Unified Planning Work Program (UPWP).

Project costs are based on the Vermont Agency of Transportation Report on Shared-Use Path and Sidewalk Construction from January 2020. Total cost may vary after further study in FY2022. For the purposes of this spreadsheet, the total cost of improvements is listed. This project is eligible for funding from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant and the town will pursue outside funding for this project.

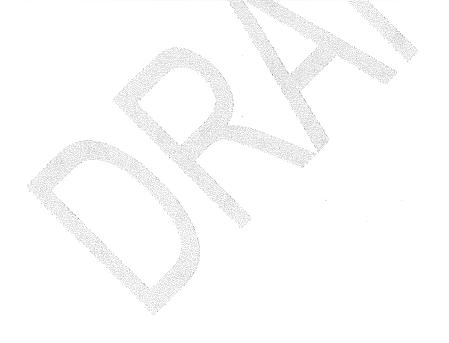

If the Town is awarded a grant from the Vermont Agency of Transportation's Bicycle and Pedestrian Program Federal Aid Grant, the required match would be \$200,000 (20 percent of project costs).

Volunteers Green Improvements

		amotino-yangsasy	102000	- procedures
Volunteers Green Playground	\$250,000	FY2026		And and the second

This project would entail the rehabilitation of the bandshell, the removal of the existing playground, and the installation of a new playground and other park features. Cost estimates include all proposed features and labor. This project is eligible for funding from the Vermont Department of Forests, Parks, and Recreation, and the town will pursue outside funding for this project.

The required match for grants from the Vermont Department of Forests, Parks, and Recreation depends on how much the town is willing to invest. Twenty percent of the project costs is \$50,000.

APPENDIX THREE - SEVEN YEAR GRAVEL PLAN

TOWN OF RICHMOND 7 - YEAR GRAVEL PLAN

				Jan-23		
FISCAL YEAR	Gravel	Extra trucking to Haul Gravel	Culvert repair or replacement	Brush clearing, flagging & ditching	Miles	Anticipated Road and Mileage to receive gravel resurfacing
FY 23 Summer 2022	\$140,000	\$15,000	\$2,000	\$2,500	3.40	Johnnie Brook Road - 1.40 miles of 1.40 mile; Snipe Ireland Road - 2.0 miles of 2.55 miles
FY 24 Summer 2023	\$140,000	\$15,000	\$2,000	\$2,000	3,35	Snipe Ireland Road - remaining .55 miles of 2.55 miles; Hillview Road - 2.30 miles of 2.30 miles; Christmas Hill Road50 miles of .50 miles
FY 25 Summer 2024	\$145,000	\$45.000	\$1.500	#2.000	3.35	Kenyon Road - 2.25 miles of 2.25 miles; Volunteers Green30 miles of .30 miles
