RE: Water and Wastewater Allocations for 8 Unit Subdivision

Dear Mr. Bressor,

This letter supplants allocation letters dated August 18, 2014, July 18, 2018 and October 16, 2018. The Richmond Water Commission has approved your requests for water and wastewater allocation as follows.

The 8 units have a wastewater allocation of 1680 gallons per day.

The 8 units contain 22 bedrooms and have a water allocation of 3,300 gallons per day.

Please be reminded that payment for the entire water/sewer allocation will be due upon final approval and prior to any construction at the then current charges.

Please contact our Water Resources Superintendent, Kendall Chamberlin, at 434-2178 for specifics on metering and connection details. Please let me know if you have any questions.

Sincerely,

Paul W. Bohne
Interim Town Manager
