Re: Town Sewer Extension

Dear Water and Sewer Commissioners;

We respectfully request that the town expand the water and sewer district and accept a connection to the system from 91 Willis Farm Rd.

We understand that there are application requirements, however there is quite a bit of engineering involved with the flow calculations, plan and specifications. Before we make that investment in engineering, we would like to request a commitment from the Commission that you will allow the connection. This commitment would obviously be contingent upon our plans meeting the requirements of the service connection permitting policy and capacity allocation ordinance.

We are confident that the Commission will uphold its obligation to serve the current users, keep their best interests at the forefront as well as protect the health of our community. And we look forward to working with you on this project.

Sincerely,

Robert and Joy Reap
