Hello Mr. Arneson-

It is our understanding that the Town of Richmond is conducting a study to investigate extending the municipal sewer and water system along the Route 2 corridor. Our firm provides engineering services to J. Hutchins, Inc. located at 88 Rogers Lane in Richmond. The [88 Rogers Lane](#) property owner is interested in this study as there are existing and proposed land uses at 88 Rogers Lane which could benefit from the proposed infrastructure expansion. Adding proposed large scale commercial land uses to the proposed sewer/water expansion could be beneficial to the Town as well.

We would appreciate it if the Town could include the 88 Rogers Lane property in the sewer/water expansion study. We would also like to stay informed on the progress and results of the study as the Town moves forward.

If you would like to discuss this matter further, please do not hesitate to contact me.

Thank you.

Ben
