Re: Town Sewer Private Connection

Dear Commissioners;

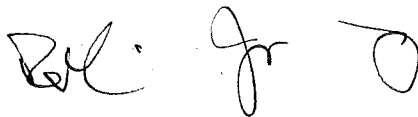

Thank you for your time discussing the expansion of the water and sewer district at the November 4th meeting. We appreciated the feedback and support from you and the public in attendance.

That feedback helped guide us in the decision to make a private connection to the system instead of expanding it. We can alleviate any concerns the board and other users may have regarding maintenance if we own the lines and the pump station. And it is our understanding that the Water and Sewer Commission will accept a private connection to the Town system.

As discussed, we are only interested in bringing sewer to our property (not water) at this time. We will build the connection using a 3" line so that it can serve all of our property on Willis Farm Rd and our immediate neighbors in the future should they want or need the service.

In order for us to make the connection to the town's lines, we need permission from the School Board to connect on their property. John Alberghini, the Superintendent, asked that the Water and Sewer Commission write a letter to the School Board stating that you support this project and explain how it could help the overall system. We respectfully request that the Commission write this letter.

Sincerely,
