

RICHMOND'S CONSERVATION RESERVE FUND

What is the Conservation Reserve Fund?

Richmond voters established the Fund in 2005 so our Town could better participate in important conservation projects. It supports property owners, non-profits and community volunteer groups in developing and implementing projects to protect important local natural, agricultural and historic resources. It enables the Town to consider and act quickly and decisively on conservation opportunities. Since its inception voters have supported the CRF with a penny on the tax rate (\$10 per \$100,000 of property valuation). The Fund is voted upon annually. Last year the vote was 844-247 in favor of renewal.

How has the CRF been used?

As shown on the reverse, the Fund has supported numerous important conservation projects ranging from Town forests to protecting recreational treasures, working farms and historic preservation.

Why was the Fund created?

In a growing town like ours, conservation opportunities can arise at any time – and just as rapidly disappear, often forever. This can make it hard to plan for or quickly find the significant amounts of money needed today to conserve important and vulnerable resources. Richmond's Fund continues to enable the Conservation Commission, Selectboard and the public to carefully review and still quickly act on key conservation opportunities.

The Fund has also greatly reduced our Town's costs of conservation. Many state, federal and private conservation funders require communities to share in project costs to show that voters support conservation. Voter-financed funds such as ours provide the needed proof, qualifying projects for very significant additional funding. So far, every dollar Richmond taxpayers have invested in conservation has generated \$3.87 in project funding from other sources – over \$2.1 million in all.

How are funding decisions made?

Proposals are made to the Conservation Commission, which assesses their compliance with the funding criteria. The Selectboard makes the final decisions after considering the Conservation Commission's recommendations. Both bodies deliberate in public sessions. For funding any land acquisitions by the Town exceeding \$20,000, direct voter approval is required.

What does the Fund cost taxpayers?

By adding one cent to the municipal tax rate, renewing the Fund would cost taxpayers \$10 for every \$100,000 of a property's assessment. That would generate an estimated \$79,000 for important conservation projects across town.

Does conserving land raise or lower property taxes overall?

An expert on Vermont tax policy, Deborah Brighton, has researched this and shown how conserving land helps keep property taxes in check. She says, "Open space tends to require few public services. More people tend to require more public services, resulting in higher taxes."

Furthermore, nearly all conserved land in Richmond, being privately held, continues generating tax revenues. (The exceptions are the Town-owned Andrews Community Forest, the Stage Road Community Forest and Overrockers Park. To qualify for public funds, landowners usually must guarantee public access to conserved land as warranted for hiking, hunting, fishing, skiing and other activities (one exception being land used for agriculture or livestock grazing).

What kinds of new projects does the Conservation Commission foresee?

Applications for CRF support can come from residents and Town committees at any time. Likely projects include rewriting the Andrews Community Forest management plan, completing a Forest environmental assessment, a Winooski River study, and repairs to trails on Town property damaged during last summer's floods.

The Conservation Reserve Fund was designed to enable Richmond to consider and act on opportunities fairly, efficiently and in a timely way. It has also served to demonstrate that our community embraces conservation, helping attract and qualify Richmond for major funding from foundations, government agencies and other potentially large donors.
