Hi Fran,

I visited the site and spoke by phone with Bob Avonda, the owner of the parcel. The work being accomplished is considered Ag maintenance for culvert crossings and as such does not require a permit per our regulations. It does appear to be on the up and up. I will keep an eye on the work but I suspect they will be completed shortly.

However, speaking with the owner, he inquired about upgrading the entrance which would require a permit. The timing is not settled but the submittal of a permit within the month would be my guess, I will keep you posted. Conversely, if there is additional activity after the Ag maintenance please contact me.

Thank you!

Keith Osborne
