Hello Bradley, the work you are hearing is for a barn for the flower farm. The Avonda have already filed a Notice of Intent to Build a Farm Structure. The Avondas Contacted me last friday to enforme me that they intended to begin construction of the barn. I have attached the notice below. As usual if you have any questions please let me know.

Tyler,

There is more work underway at the Hillview Heights property today (July 14). We can hear construction equipment in the back part of the property. At the entrance to the proposed Lots 4-7 driveway there are two cones and a sign for "Hogan Excavating LLC" which says they do "digging and dumping" and lists a phone number. On Sunday (July 9) a large flatbed truck delivered a heavy duty digger, one with bulldozer treads and a large bucket. Once it was unloaded, the digger proceeded up the access road that accesses the proposed Lots 4-7.

Can you let me know what the work is that is underway presently and can you send me any relevant documents that permit them to conduct this work?

Thanks,
Bradley
