Dear William,

On April 19th 2018, I went on site to inspect the connection to the previously approved wastewater system for the 3 bedroom SFR. Also inspect the 1 bedroom apartment (garage addition) to a new shared on site wastewater disposal system. These were installed by the contractor Alex Carver Northern Timbers Construction Inc. At this time it was noted that the shared drilled bedrock well was installed as per site plan. Also included is the water testing for the drilled well.

"I hereby certify that in the exercise of my reasonable professional judgment the installation-related information submitted is true and correct and the potable water and the wastewater system: were installed in accordance with: the permitted design and all permit conditions are in compliance with the applicable rules, were filed with the Secretary, and are in accordance with all other permit conditions; were inspected; were properly tested; and have successfully met those performance tests.

If you have any questions, please call.

Sincerely,

David A. Tudhope
