

## TECHNICAL MEMORANDUM

**TO:** Josh Arneson, Town of Richmond  
**FROM:** Sai Sarepalli, P.E.; CCRPC  
**DATE:** 09/01/2026  
**RE:** Hinesburg Road Speed Study update

### 1. Introduction

The Town of Richmond requested the Chittenden County Regional Planning Commission (CCRPC) staff to reinvestigate and reevaluate the previously conducted speed study in 2021 on Hinesburg Road. The previous study recommended lowering the speed limit to 40 mph from the intersection of Huntington Road to approximately 0.5 miles south of Mansfield Way. The purpose of this study is to evaluate latest speed data, document findings and develop recommendations for establishing speed limits on Hinesburg Road between 0.5 miles south of Mansfield Way and the Hinesburg Townline.

### 2. Existing Conditions

Hinesburg Road is a paved road classified by the state as a Class II Town Highway and functionally classified as a Major Collector. The study area extends from the intersection of Mansfield Way to the Hinesburg Townline. The CCRPC staff installed two Automatic Traffic Recorders (ATRs) along Hinesburg Road at locations shown in Figure 1 to collect traffic volume and speed data. Data were collected between May 29, 2025 and June 04, 2025. Figure 1 shows the study area and ATR location.

Figure 1: Study area and ATR Locations

### Windshield Survey

A windshield reconnaissance survey was conducted in both travel directions along Hinesburg Road by the team to identify safety related issues, roadway characteristics and roadside safety hazards. The following is a list of findings from the survey:

1. The roadway width varies between 20 and 24 ft.
2. Very narrow asphalt/grass shoulders exist on both sides of travel lanes.
3. The posted speed limit is 45 mph.
4. Some driveways are obscured due to vegetation along the study area.
5. Significant embankment slope along an edge of the road at some locations in the study area.

### Crash History

The VTrans public crash data query tool indicated two reported crashes, a head-on injury and a single vehicle crash, in the last five years (July 2020 – July 2026) within the study area.

### Speed and Volume Data

Traffic volume and speed data (attached in the Appendix) were collected using two ATRs in the study area. Table 1 below shows a summary of speed and volume data.

**Table 1: Speed and Volume Data**

|                       | Location A |            | Location B |            |
|-----------------------|------------|------------|------------|------------|
|                       | Northbound | Southbound | Northbound | Southbound |
| 85th Percentile Speed | 50         | 54         | 53         | 52         |
| Average Speed         | 47         | 49         | 49         | 48         |
| 10 mph Pace           | 41-50      | 46-55      | 46-55      | 44-53      |
| ADT (veh/day)         | 1856       |            | 1716       |            |

The observed 85<sup>th</sup> percentile speed for the northbound and southbound directions in the study area was between 50 mph and 54 mph. The posted speed limit is 45 mph. This indicates that the majority (85 percent) of drivers are driving at or below 54 mph (9 mph over the posted speed limit) in the study area.

## **3. Findings and Recommendations**

Hinesburg Road is paved and exhibits narrow shoulders with steep embankments along the edge of pavement at some locations. As per the observed 85<sup>th</sup> percentile speed data, the majority of drivers traveling at or below 54 mph on Hinesburg Road within the study area.

Despite the observed 85<sup>th</sup> percentile speeds, upon considering roadway characteristics and lack of shoulders and steep embankment slopes, grade, obscured driveways, and rural residential land use, **it is recommended to lower the speed limit to 40 mph from 0.5 miles south of Mansfield Way to the Hinesburg Townline.** It is also recommended to re-stripe the edge line maintaining at least a 10 ft travel lane in both directions.

The Town should consider implementing site specific traffic calming measures such as radar speed feedback signs, dynamic pavement striping, gateway treatments etc., with a combination of countermeasures such as public outreach and education, safety corridor campaign and increasing enforcement targeted at motorists who are driving 10 mph above the speed limit.

---
