**Subject: Re: Town Plan Renewal Follow-Up to
Water Sewer**

The town plan steering committee has curated a survey that should help to gather feedback.

[Town Plan 2026 Steering Committee - Town of Richmond, VT](#)

It is sorted into sections of the Town Plan.

These surveys are not limited to one response for the whole commission. Each individual member can complete it independently and is encouraged to do so.

Thanks,
Chelsye

Greetings,

As Chair & Vice Chair of the Water/Sewer Commission please kindly verify receipt of the attached communication on behalf of the Town Plan Steering Committee.

Feel free to disseminate to other members of the commission as we are hoping for a great amount of thoughtful feedback.

Also, keep in mind that some response is better than no response; do not feel as though you must be wholly thorough in your reply at this point in time. Even a preliminary

appraisal will be very valuable to the committee.

The Town Plan revision is an ongoing process that is evolving and will undergo many edits and iterations. We will be certain to engage in your expertise throughout the process, and look forward to interacting with the town as a whole.

For the time being please feel to direct your responses to either myself, Virginia Clarke, or Keith Osborne. Once we have established a Steering Committee email it will be posted to the committee page on the Town of Richmond website.

Many thanks,
Chelsye Brooks
On behalf of the Richmond Town Plan
Steering Committee
