RE: Follow up on Option to Install Additional Curb Stop in Conjunction with Upcoming Water Main Replacement Project.

The Town of Richmond recently sent you a letter regarding the option to add an additional curb stop to your property in conjunction with the waterline replacement project on Tilden Ave., and portions of Bridge St., and Cochran Rd. The cost of the installation was estimated at $1,500. We understand that an estimated cost of $500 had been discussed at previous Water and Sewer Commission meetings and that the $1,500 cost estimate came as a surprise to some customers. The $500 cost was an estimate provided prior to consultation with the project engineer.

The $1,500 cost is an estimate provided by the project engineer and includes the cost of

- The connection to the water main
- Piping from the water main to the curb stop
- The curb stop and box
- Labor

We apologize for the confusion regarding the cost estimates. If you have any further questions or you are interested in installing a curb stop please contact Water and Wastewater Superintendent Steve Cote at scote@richmondvt.gov or 802-598-4593.
