Thanks, Kendall. Yes, applying fluoride is voluntary. If you have questions or are considering ceasing operation of the fluoridation equipment, I encourage you to talk with Linda with the Health Department first.

Good morning.

We had a little trouble with the lines at the beginning of the month. We got the average back up to 0.5, report is on the way.

Thank you.

Hi Kendall,

We were going through some of the fluoride data for Richmond and saw a sudden increase in the concentration based on the weekly test you submit to the health department lab. In looking at prior monthly reports I see that the concentration is normally rather low, lower than the target range for dental benefits, so I wanted to check in to see what's going on, what your targets are, and to confirm that the daily target should be about 0.7 mg/L.

If you're having issues with the equipment, you can contact Linda Greaves in the health department.

Thanks,

Ben
