

WHY A NEW FLUORIDE DELIVERY PRODUCT?

- *Approximately 25% of the USA population does not have access to fluoridated water, mostly smaller PWS.*
- *Demand for a simple, passive fluoridation system familiar to operators of small PWS.*
- *Need for easier handling and reduced safety risk.*
- *Desire for reliable and consistent feeding of fluoride in small quantities.*
- *Reduction of installation cost making it more affordable for small PWS.*
- *Eliminates need for water softening in hard water applications.*
- *Product made proudly in the USA.*

The First Advancement in
Water Fluoridation
Technology in 40+ years.

We are excited to bring to market The "New Wave" Fluoridation Tablet and Feeder System. This "New Wave" Fluoridation Tablet and Feeder System allows a smaller PWS with a maximum flow rate of 1 million gallons daily (1MGD) and with an approximate population of 10,000 clients or less the ability to provide a more cost effective, low maintenance way to supply a more consistent level of fluoride to smaller PWS.

New Wave Fluoridation Tablet and Feeder System

WILL PROVIDE A
COMPLETE "TURN KEY"
PRODUCT, INSTALLATION,
TRAINING PLATFORM TO
CUSTOMER WITH A MENU
SYSTEM.

HOW THE KC INDUSTRIES'/DUBOIS' "NEW WAVE" FLUORIDATION TABLET AND FEEDER SYSTEM WORKS

FIELD TESTING CONDUCTED

Feeder

Tablets

- **Self contained feeder system**
- **Tablets are added to the feeder system**
- **200 tablets per feeder tube**
- **Product is released through water erosion of surface area to saturation**
- **Able to fluoridate approximately 300,000 gallons/day per tube at 0 background fluoride**
- **Expandable to 3 Feeder tubes**

- **Field tests conducted**
 - **Colorado**
 - **Florida**
 - **Georgia**
- **Modifications based on field results**
- **Implemented design updates**
 - **Ability to expand**
 - **Flexibility to easily customize**

The New Wave Fluoridation Tablet and Feeder System is the First Advancement in Water Fluoridation Technology since the 1960's.
