Hi Josh,

I would like to submit a letter of interest to fill the open position on the Water and Sewer commission. I have been a resident of Richmond for over ten years and I would like to give some time back to the community by serving in local government. The water commission seems like a good place to get my feet wet. I have never served on a town board before but I have been on the Board of Directors for a non profit, Dinners with Love, and the Addison County 4H Dairy Committee. I look forward to the potential opportunity to serve on this board and learn more about how our Water and Sewer department works!

Thank you for your consideration,  
Erin Farr
